ABOUT ME

As a person, I am a highly motivated individual with a strong desire for continuous learning and self-improvement. My passion for programming is fueled by my love for technology, design, and problem-solving.

My background in Architecture has given me proficiency in design and composition, and a methodical and reliable work ethic. I am always striving for efficiency and precision in my work.

EXPERIENCE

FRONT-END DEVELOPMENT COURSE

8 mo.

The Odin Project

- Gained a solid foundation in HTML and CSS, including essential concepts such as semantic markup, responsive design, and the box model.
- Gained a foundation in JavaScript (ES6), learned about basic syntax and data types, control structures and functions, DOM manipulation, Asynchronous programming, and object-oriented programming principles, and built various single-page applications.
- Used web development tools on every project: Git, GitHub, npm.
- Used React for more complex projects, and created re-usable components.

ARCHITECT

8 mo.

UAB "Aplan"

- Worked on large-scale complex projects individually and with a team.
- Working on tight deadlines with several projects at once required organizational and time management skills.

INTERN ARCHITECT

2 mo.

TADO BALČIŪNO ARCHITECTURE STUDIO

- Learned effective communication and collaboration in a team-driven environment.
- All projects required using PhotoShop for prototypes and layouts, design and composition skills, and creation of visually appealing designs.
